SESSION TRACKING

The Session Tracking Add-On lets administrators add a block to any EasyCampus course in order to track session time based on user click activity. You can set start and end dates to calculate cumulative activity and track intervals between clicks. The record of all registered user session times can be downloaded to Excel format for later reporting and data manipulation.
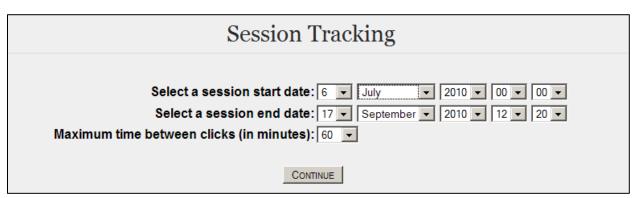

Steps

1. Add the Session Tracking Block
2. Define the Session
3. View Tracking Information
4. Download All User Results
